Combi Cutter

CC-32/34

Small machine with potential

HALLDE's Combi Cutters is a perfect compromise for the smaller kitchen. The CC-32 and CC-34 models are both vegetable preparation machines and vertical cutters in one machine. They are small and compact and easy to put away and take out when you need them.

HALLDE Speed Selector

The CC-34 has four speeds; 500 and 800 rpm for the vegetable preparation and 1,450 and 2,650 rpm for the vertical cutter. The machine automatically detects which top is attached and sets the speed to be used. The CC-32 has two speeds, one high and one low.

Developed for the best hygiene

The CC is manufactured solely from hygiene certified material. The machine has smooth surfaces, rounded edges and has no unnecessary recesses where food might penetrate and get stuck. For rapid cleaning, all loose components are easy to remove making the machine easy to rinse. All loose parts can be washed in the dishwasher.

Only the best material

The machine base is manufactured of robust metal. The feeder is strong polycarbonate and the bowl is stainless steel. Only top quality stainless knife steel is used to manufacture the cutters' knife blades.

Highest possible reliability

The powerful motor is geared down and has a high torque, which makes the CC-machines exceptionally reliable – irrespective of the foods you are working with. If the motor is called on to work harder, more power is supplied to ensure even running.

Vegetable cutter

When the pusher plate is folded up the machine stops for filling. When it is folded down the machine restarts and you can continue working. This automatic start and stop function makes your work more effective. A clear advantage, particularly when larger volumes are involved. The feeder has a feed tube for preparing long and narrow items like cucumber or leak.

Double safety against unprotected knife

If the feed cylinder is removed the power is cut. Thanks to this double security there is no risk of the machine starting with an unprotected knife.

Cutting tools for all occasions

Our wide range of large Ø185 mm cutters means the CC can handle every conceivable task. The CC slices, dices, grates and shreds everything from firm to soft products. The CC-34 can also dice which is unique in its class. The knife blades and grating plates are interchangeable which means you do not need to buy new tools.

Vertical Cutter/Blender

The three litre bowl has a tightly sealing lid that allows for the preparation of larger volumes of both liquid and dry ingredients. The vertical cutter can be run at two speeds 1,450 and 2,650 rpm. It also has the pulse function that provides direct access to the higher speed. The pulse function gives better control when you are chopping or blending. The CC-32 has one speed, 1,450 rpm and has no pulse function.

Smart functions

The CC-34 has a patented scraper system with three scraper arms. These keep the lid and the inside of the bowl clean. At the same time they move the ingredients towards the knives during preparation. The design and angle of the knives in combination with the scrapers means that the ingredients are turned in the bowl giving the whole content a uniform texture. This gives perfect results in quick time. The knives are serrated which makes them more wear resistant. The CC-32 comes without scraper.
