

### Size that matters

RG-200 is designed to suit the kitchen with smaller volumes but who needs the quality and power of a large professional vegetable preparation machine. The size makes the machine suitable to use directly on a kitchen workbench. The leaning design means that the feed cylinder is always positioned at the right angle making it is easy to top up.

Thanks to the automatic start and stop function the machine stops as soon as the pusher plate is swung aside. When it is swung back the machine restarts and you can continue working. The RG-200 also has a full moon cylinder that can hold larger quantities and whole products. Features like these are a clear advantage, particularly when larger volumes are involved.

# ceptionally reliable machine - irrespective of the products you are preparing.

**Cutting tools with** 

Highest possible reliability

and running torque and powers the

The powerful motor has a high starting

direct-driven cutting tool. No belts or in-

termediate connections. The power from

gear drive. This makes the RG-200 an ex-

the motor goes via a maintenance free

complete register Our wide range of cutting tools means the RG-200 can handle every conceivable task. You choose the cutting tool you need to make you even more efficient in the kitchen. The RG-200 slices, dices, shreds, grates, makes juliennes and crimping slices - everything from firm to soft products. The blades and grating plates are replaceable. As a result you do not need to buy new cutting tools.

If the feed cylinder is removed the power is cut. Thanks to this double security there is no risk of the machine starting with an unprotected blade.

### Always perfect cutting results

The rotation speed of the cutting tools is optimised for cutting fine and even slices as efficiently as possible. The blades are purposely sharpened to avoid inertia or the edge breaking off.

### Developed for the best hygiene

The RG-200 is manufactured solely from hygiene certified material. The machine has smooth surfaces, rounded edges and has no unnecessary recesses where food might penetrate and get stuck.

For quick cleaning are all loose parts simple to remove for easy rinsing of the machine. The feed cylinder is removable and can be cleaned under running water.

Machine base, feed cylinder and pusher plate are all made of robust metal. Only top quality stainless steel is used to manufacture the cutting tool knife blades.

## Lightweight and easy to move

The relatively small size of the machine gives several advantages. It does not take up a lot of space in the kitchen. You can use it as a table top machine. And it is easy to move, something which is helped by the generously sized handle on the back.

**Food Preparation Machines** Made in Sweden

# **RG-200 Vegetable Preparation Machine**

- Large full moon shaped feed cylinder that can take most items whole.
- Direct driven cutting tools from a strong heavy duty motor with planetary gear transmission.
- Leaning design reduces stress on shoulders and back when the machine is being refilled.
- Angle top Feed head as an accessory for cutting angle shaped slices. Good for Asian wok dishes or for different types of soup.
- Detachable support wall enables easy piling of tomatoes, onions, bell peppers etc. for oriented slicing or to fit larger products whole such as lettuce or cabbage.
- Table top model that can be used on a kitchen workbench.

### Machine

- Motor: 0.37 kW. One-speed. 120 V, single phase, 60 Hz. 230 V, single phase, 50 Hz. 220 V, single phase, 60 Hz.
- Transmission: Planetary gearing.
- · Safety system: Two safety switches.
- Degree of protection machine: IP44.
- Degree of protection push buttons: IP65.
- Power supply socket: Earthed, single phase, 10 A.
- Fuse: 10 A, delayed action fuse.
- Sound level LpA (EN31201): 73 dBA.
- Magnetic field: Less than 0.5 microtesla.

### Materials

- Machine housing: Anodized and polished aluminium alloy.
- Cutting tool discs: Aluminium alloy.
- · Cutting tool knife blades: Stainless knife steel.
- Machine table: Stainless steel.
- Container: Polycarbonate.

### Feeder

- Feed cylinder: Volume 3 litre. Height 185 mm. Diameter 170 mm.
- Feed tube with internal diameter 56 mm.

### **Cutting tools**

- Diameter: 185 mm.
- Speed: 350 rpm (50 Hz), 420 rpm (60 Hz).

### Type of preparation

- Slices, dices, shreds, grates, makes julienne and crimping slices.
- Processes fruit, vegetables, dry bread, cheese, nuts, mushrooms, etc.

• For restaurants, pizzerias, salad bars, schools, hospitals, fast food counters, ships, catering kitchens, etc.

### **Net weights**

- Machine: 18 kg.
- Cutting plates: 0.5 kg.
